

Blackberry Modem Setup for VISTA

Go to **start**

Go to **control panel** and switch to classic view (the option is located in the upper left section)

Go to **phone and modems**

Click on the **modems** section (if it asks for location information put in only the area code and click OK then click on Modems tab)

Click on the **standard modem** and go to **properties** (lower right).

In the **General** tab click on **change settings**, click **continue on inquiry if uma is on** Click the **advanced** tab.

Type in the **init string**: at+cgdcont=1,"IP","wap.voicestream.com"

SUNCOM CUSTOMERS: at+cgdcont=1,"IP","internet"

Click on **ok**.

Close out of phone and modems.

Go back to the **control panel**.

Go to **network and sharing center**.

On the left hand side tab select **set up a connection or network**.

On the next screen choose **setup a dial up connection** then press next

Select **standard modem**

Enter ***99#** for the **phone number**

Leave the **username and password** blank

Type in **T-mobile** for the **connection name**.

Click **connect**.

If it Connects skip to **step 9** and choose **Home** as the location.

If it fails choose **set up connection anyway**

Go back to the **network and sharing center**

Click on **manage network connections** (toward the bottom on the side panel on the left).

Find the **T-mobile** dial up connection

Right Click on the connection and choose **Properties**

1. In the **General** tab choose **Configure**
2. **Uncheck** all the **Hardware** features. (there are three)
3. Click **Ok**
4. Click on **Options** tab
5. Click the **PPP settings** button
6. **Uncheck** all the boxes.
7. Click **Ok**
8. Click **Ok**
9. **Right click** on the connection and choose **Create a Shortcut**.
10. Windows will say 'Can not make a shortcut here do you want it on your desktop?'
11. Click **Yes**
12. Close the windows and open the **Browser**.
13. If it asks you for a **location** Choose **HOME**.
14. If you do not choose home Vista will firewall the connection on every level and you will probably not be able to connect unless you make a new one.
